

Der AQUIVATOR is a tachyonized water jet adjuster with a joint and intermediary coupling, which can be screwed onto any conventional water tap. It fits all water tap types with

This cost-efficient variation features three advantages:

internal or external threading.

- the water is vitalized
- most of the lime in the water is brought into suspension, resulting in less limescale deposits
- it slightly swirls the water, thus saving up to 50% of water consumption

The AQUIVATOR is useful in rented apartments, holiday homes, hotel rooms etc. and can be easily mounted and dismounted

## **TECHNICAL DETAILS**

Material: Chrome steel
Size: 24 x 38 mm
Thread: 3/8", 1/2" M22
