

GEO PLATES

The **GEO PLATES** can be used in many different ways. The larger the plate, the larger the sphere of activity.

Earth rays/Water veins

For conventional influences, place four GEO A6 plates flat on the ground as an isosceles square in the corners and one in the center (point of intersection of the corners). In an upright position their effectiveness is not achieved. For larger areas use A5 or A4 plates.

For very strong influences (e.g. accumulations etc.), additional products may be required. A verification is therefore recommended.

Wall drying

Place five GEO A6 plates as a three-dimensional pyramid on the ground and the ceiling of the affected room. (this has only an impact, if the damp walls are caused by blocked energy and not by structural defects.)

Food vitalization

Place the food on the plate for a few minutes to harmonise it. Negative information is transformed on an energetic level. The larger the plate, the more volume can be vitalized. Of course, this is also possible for beverages.

TECHNICAL DETAILS

Material: Glass fiber fabric, laminated

Size: A4, A5 und A6
